

# HOW TO PLAY BATTLETOOTH

**Setup:** Color in your Battleteeth. The number of teeth in the ship are the number of squares you should color in. Your ships can't be overlapping.

**Goal:** Sink the other player's ships first

## **Instructions:**

1. Decide who goes first.
2. The first person to go will guess where the opponent's ships are, by saying a letter and a number. If the other player has a ship in the square you guessed, they will say "Hit" and you will mark the space with an X. If the other player doesn't have a ship there, they will say "Miss" and you will mark the space with an O, or you can color the square in.
3. After the first player's turn the other player will go and guess where their opponent's ships are.
4. Go back and forth until one of the player has all of their Battleteeth hit!
